

IVIES CHASE YOU
YEAR END REPORT

2025

IVIES CHASE YOU

MESSAGE FROM OUR FOUNDERS

Monika Ladia & Aman Ladia

Dear Parents,

We would like to begin by thanking you for your interest in learning more about how we guide students, from Grade 8 to Grade 12, through the competitive journey toward top universities. Each stage is critical, from building a strong foundation in the earlier grades to preparing standout applications in the later ones.

Whether your child is just beginning to explore their interests or approaching the final stretch of applications, our tailored approach ensures every detail is optimized. **We work with a select cohort of students**, allowing us to be deeply involved in each applicant's journey. Over the past 10 years, this strategy has worked exceptionally well, and we are proud to announce that the past application cycle has been our most successful till date. Detailed results are attached in this booklet.

Out of our 2025 cohort, 62% of applicants received offers from the top 20 colleges, especially the Ivy League. This includes universities like Stanford, Princeton, Yale, Northwestern and more. We also received 22 admits at top-10 universities in the UK like Cambridge, Imperial, UCL and King's College. Besides the West, our students placed at NUS, NTU, University of Melbourne and tier-1 global colleges. Cumulatively, they received $5,800,000 in financial aid covering up to 100% cost of attendance.

We would now like to invite you to be a part of our cohort this year. Unlike other advisors who create hundreds of clones with generic, repeated advice, we aim to make your child stand out by capitalizing on their individual character and strengths.

Whether your child is building foundational skills, exploring new interests, or preparing for college applications, we offer personalized guidance at every step. From identifying impactful extracurriculars to crafting standout applications, we ensure their journey is strategic, comprehensive, and geared toward success.

Kindly note that our cohort is selective, and we have limited slots available for new students. Please message us at +91 9619458430 to learn more and apply for our next cohort.

In the meanwhile, we invite you to explore our process and past results through this year-end report. Please also visit our website, https://ivieschaseyou.com to watch live interviews with successful candidates, join free weekend webinars and see the difference we make in our students' lives.

Once again, thank you for exploring our program. We look forward to mentoring your child through a successful college journey.

2025 Admissions: A Year to Remember

We are pleased to announce a landmark year of achievement: 62% of applicants received offers from the top 20 colleges, which includes universities like Stanford, Princeton, Yale, Northwestern and more. Three students were placed in prestigious Penn M&T & Berkeley MET dual degree programs, which accept just 20 students per year. Another 9 students received BS/MD admissions at Brown, Case Western, Rochester and Connecticut. Besides the US, we received 22 admits at the top 10 UK universities like Cambridge, Imperial, UCL and King's College. Our students also placed at NUS, NTU, Melbourne, Tufts, Harvey Mudd & tier-1 colleges. Cumulatively, they received $5,800,000 in financial aid covering up to 100% cost of attendance.

We Produce Adept Engineers, Budding Psychologists and Capable Doctors

Our students excel across a range of fields, from computer science and engineering to history and architecture, as well as medicine and law. A non-exhaustive list is below:

STEM Programs

- Computer science
- Engineering branches like mechanical, mechatronics, electrical and aerospace
- Mathematics
- Applied & theoretical physics
- Biological, Pre-medical & BS/MD courses
- MBBS courses (outside US)
- Biochemistry & biophysics
- Environmental sciences
- Astronomy

Humanities & Arts Programs

- Economics
- Business management / finance
- Psychology – clinical & research
- Design and visual arts
- History and Geography
- Pre-Law
- International relations / global politics
- Direct LLB courses for law
- English and gender studies
- Music and visual arts

IN THE NEWS

THE TIMES OF INDIA · STEMpedia · Global Indian · NHSJS The National High School Journal of Science

Our students have been received recognition for their work from numerous news organizations, non profits and other publications. Here, we showcase a few recent examples to highlight our relationship of trust which has led to outstanding outcomes.

Winner - CashWise: Interactive Game for Financial Literacy Education

- **Credit:** Project created by Advit Ranawade from India
- **Project Category:** Animation, Artificial Intelligence, Game, Quiz
- **PictoBlox Extensions:** NA
- **Project Tag:** Banking, Codeavour Winner

Download PictoBlox File

Advit Ranawade, a student from India, developed an interactive game, "CashWise" to make financial literacy more interesting for kids. It modifies the traditional way to teach fundamental concepts such as banking, investing, and stock exchange investment. The game has four features – banking system, account, buying and selling portal, and the stock market.

In the banking system, children learn about the concept of interest and different types of bank accounts. For example, a fixed deposit offers high interest rate but the money is

Aadya Joshi: The Stanford grad spreading awareness on native plants through The Right Green

COMPILED BY: TEAM GI YOUTH

When she was a junior at the American School of Bombay, Aadya Joshi founded The Right Green, an organisation that spreads awareness about native plants and their ecological role in providing food and habitat for local species of insects and birds. Now a student at Stanford University, Aadya also received the prestigious Children's Climate Prize in 2020.

Everyday, Aadya Joshi would notice the neighbourhood police station on her way home from school in Mumbai. Outside the station was a vacant lot, full of confiscated vehicles that had not been claimed by their owners. Locals had also begun adding their trash, and the result was a landfill in the middle of a residential neighbourhood. Aadya wondered why nobody was doing anything about it, and in the end, decided that she would be the one to try. "In the end, I went to the police commissioner and the inspector and I said I can make a garden in this garbage dump if it's not being used productively," the *Global Indian* says. The police took a while to decide but ultimately agreed.

Anoushka Sabnis is a 15-year-old author based out of India. She is a 4-time published author and holds a World Record for being the "Youngest poet to publish a poetry book internationally (female)". Over the years, she has written & published multiple short stories, essays & poems. She has won the 'Gold Award' twice at the Queen's Commonwealth Essay Competition, organized by the Royal Commonwealth Society, London. She is also a Global Goodwill Ambassador, as recognised by the GGA Foundation, USA, and a member of the Commonwealth Students Welfare Group of India. She runs a startup called 'Bibliioverse' with a mission to encourage reading & writing amongst children & young adults. She is currently developing this platform to emerge as a community for readers & writers. Anoushka also enjoys debating, baking, listening to music & playing badminton.

For Bengaluru girl Annanya Karthik, world is the stage

Annanya Karthik

BENGALURU: Annanya Karthik, 16, was busy rehearsing for Peter Pan at the Bangalore School of Speech and Drama, HSR Layout, on Sunday. With the musical set to be staged on June 23-24, rehearsals are a daily affair and go on for 2-8 hours. Around 3pm, she got a break to check her ICSE results and in no time, the troupe broke into celebrations.

Annanya joined the drama school when she was in class 10 and attended classes every weekend. "It has helped in broadening my theatre horizons and enabled me to find myself as a person. I love theatre because not only does it give an opportunity to live in someone else's story, it is also a chance to tell the world about many people. It invokes empathy and gives a place

Mumbai Student Develops Novel Method for Solar Energy Prediction and Forecasting

By **Rishi Sankhe** - October 31, 2023 · 2116 · 0

The growing shift towards sustainability sees solar energy at its center, incentivizing world energy leaders to exploit the energy source's benefits. However, harnessing the potential of solar power comes with a few challenges. Predicting and forecasting solar energy output plays a quintessential role in overcoming these challenges, including determining the

HEAR DIRECTY FROM **OUR STUDENTS**

Feedback from past cohorts

At Ivies Chase You, we remain connected with our students far beyond their college journey, learning from their successes and offering our guidance as needed. Here's what a few of our students have to say.

RISHI SANKHE
Yale University

"You can't copy others to get into the college that you want. The most important part is to be unique, and Mrs Ladia does that best - she picks out interests that show what you're really the best at. She taught me to follow my own path instead of chasing what others are doing."

ARJUN KOHLI
UC Berkeley

"The roadmaps made by Mrs Ladia were incredibly helpful - once you have her plan, it becomes very easy to follow it and reach your goals. Meeting Mrs Ladia helped me analyze how college admissions officers would see me, and which areas I needed to focus on the most."

ANOUSHKA SABNIS
NUS & King's College London

"The best part of my applications was that Mrs Ladia was always available to clear doubts, make critical decisions and especially to give feedback on the college essays that I wrote. I had no guidance besides Ivies Chase You so it was very helpful to have such a powerful support system with me."

VANSHIKA GUPTA
Amherst College & Oxford

"The entire application process is very confusing - you don't know where to start. Having access to Mrs Ladia with step by step support made this so much simpler for me, helping me prioritize & write great applications. This ultimately led to me receiving a 100% scholarship at Amherst."

RUCHIKA BHUYAN

Columbia & Brown

"As someone with interests in many different areas, Mrs Ladia helped me tie everything together - from activities to academics, essays to portfolios. The amount of effort put into making my applications detailed is very commendable and I am incredibly grateful for her support in this regard."

DIYA MUCHHALA

UCLA & UToronto

"The roadmap given by Mrs Ladia was my bible for the application journey. Mrs Ladia knows what she is doing & she ensured that I met every deadline no matter what. The guidance given by the team was well thought out and as a result I even received a scholarship of $100k for college."

ANANNYA DAWER

Parsons, Pratt & FIT New York

"I wanted to apply to the best design colleges in the world but had no idea where to begin. Ivies Chase You took me through the process step by step, helping me with essays, portfolios and other application components. I thank Mrs Ladia & her team for helping me reach top colleges in my field."

NISHANT SOOD

Carnegie Mellon & Georgia Tech

"Before Mrs Ladia, I was exploring my interests without a clear direction. Meeting her helped me realize how the dots connect, which led to a powerful portrayal in my applications. For instance, she helped me connect my interests in Art & STEM, something that I could not do by myself."

OUR SUCCESS FORMULA: **UNMATCHED PERSONALIZATION**

#1 – DATA DRIVEN DECISIONS WITH AI INSIGHTS

From selecting colleges to identifying preferred majors, our recommendations are backed by a proprietary database of over 8,000 students. Leveraging cutting-edge machine learning models, we uncover trends and opportunities that others often miss.

#2 – UNWAVERING FOCUS ON INDIVIDUALITY

Our mentorship is rooted in creating a unique profile for every student. From in-depth analysis forms to personalized roadmaps, every step is tailored. We tie together existing skill sets to ensure efficient use of your time for smart work.

#3 – PRECISION IN APPLICATION CRAFTING

We transform your story into a compelling college application by meticulously refining each component. With paragraph wise edits on essays, we ensure every draft represents the most impactful version of you and impresses top admissions committees.
